SUPERSORT 2900

*We Maximise Profitability
Through Transactional
Security and Efficiency*

The AVANSA SuperSort 2900 double pocket mixed value note counter can count up to 20 different currencies. You are able to attach a printer to this model (optional extra). This will improve cash up time and reduce loss due to human error. The SuperSort is a two pocket counter that does not stop counting when a suspicious note is found, it just puts the note into the reject pocket. This machine also has pattern recognition, **the most effective** way to pick up counterfeit. In the single count mode the SuperSort will pick up a different note in a **bundle** of single denomination notes. **Quite** simply the best and most reliable note counter.

Counting speed	900 - 1200, 1500 notes / min
Net Weight	14kg
Hopper capacity	300 notes
Stacker capacity	200 notes
